Colourificator Crack+ Activation Code [Win/Mac]

Colourificator Cracked 2022 Latest Version is a small, simple and most importantly, very easy to use color identifying tool. It means that it can help you define any color you see on your screen. Pick one The application relies on a simple eye-dropper tool to pick colors. You can click anywhere on the screen, and view the color that lies at the tip of your eye-dropper. Color names The software is capable of picking any color from your desktop, even if it is in a single pixel. It then displays the result in the color box from the main window. You can view the color you have chosen as well as the RGB values that define it. The name of the color is in fact the HEX code by which it is recognized in digital environments. The software can automatically generate a color's HEX code, once it finds it. You can then save it by clicking the Copy button, which sends your color code to clipboard. Create more colors Colourificator features a scroll bar and a value box for each of the RGB parameters. You can change the values for either of them and the result is a new color, displayed in the dedicated box, with the adjacent HEX code. Always on top It means that your application can stay fixed on your screen and not be covered by other windows that pop up on top of it. You can view Colourificator on your screen at all times, or, on the contrary, you can send it to the system tray and let it run in the background. Moreover, Colourificator gives a whole new meaning to the term 'user-friendly'. Not only it is easy to use, but it also respects your preferences about the spelling of the word 'color/colour'. Colourificator is for Windows XP and above. Size: 17 mb Colourificator is a small, simple and most importantly, very easy to use color identifying tool. Colourificator Keygen

Colourificator is a free, easy-to-use and reliable utility. With it, you can color your computer display, identify and transform colors from images, preview and manage desktop color palettes, save colors into your clipboard and easily save color selection data in the Registry. Features: Select color The main window includes a toolbox to select color. With this tool, you can change color. You can click on any part of the screen or use a cursor to select colors or segments of colors. The color spectrum is displayed in the color box. You can view any of the RGB (red-green-blue) values, which define the color, and click to paste them into the color box. The RGB values generated are stored in the registry so you can view and edit them. Colors in the Registry Colourificator reads and writes colors from and into the registry. You can access a color's registry tag directly and save it on the clipboard. You can also edit color registry tags and import the registry values to and export them from the application. It is possible to view or edit colors in a number of windows, including the Registry and the control panel. Create new colors Colourificator allows you to change one or more color parameters. The palette generates the color and saves it to your clipboard. You can see what colors are stored in the clipboard, where in your color space they are located, what RGB values are involved and where these colors can be found in your computer. You can copy color information, like the registry keys and color code, from one color box to another or into the clipboard. Rotate, transpose, mirror and blend colors You can easily rotate colors on the screen or in a pixel. You can mirror, mix, transfer and rotate colors. Colourificator comes with a color picker, the integrated color wheel and the ability to create customized color wheels. You can create custom color palettes. You can load, modify and save to a palette file. Colorificator has a palette feature that allows you to load, display and edit color palettes. You can load or export palettes. You can change color color schemas and color space with palettes. Colorificator Description Colourificator is a small, straightforward and easy to use tool which allows you to modify colors and edit color palettes. It is especially useful for web designers and photographers that want to save their favorite color
