Speaking at a University of Oxford conference on the subject of obsessive compulsive disorder (OCD) in London today, Prof Harvey said that finding out what makes OCD so debilitating is the first step to developing new treatments. Prof Harvey said: 'Clinically, we know what makes OCD so disabling and so difficult to treat. However, we don't yet understand why those with OCD are so vulnerable to developing it in the first place. We also don't know why the medication we use to treat
