Pensioner wins £4 million  
payout A pensioner has won  
£4 million in compensation  
for the loss of her home  
after a gas leak caused her to  
suffer serious burns. The  
58-year-old was at her  
bungalow in Warwick Lane,  
Newport, when the gas  
escaped from a faulty tap  
and started flooding the  
property. She was overcome

with fumes and suffered burns to her face, neck, arm, chest and stomach. The gas ignited and it is thought a spark set fire to a computer box which had not been properly grounded. Rhys Howell, prosecuting, said the pensioner was left terrified after the incident and was unable to sleep or eat. He said the burn to her face became infected and caused her to lose her sense of taste and smell. Her feet and legs were so painful she could not walk and had to be carried from the house. After suffering from chest infections and infections to

---

her face she was taken to hospital where skin was removed from her right hand. She also had fluid drained from her face. Rhys Howell said a draft gas safety report from September 2006 stated that a fuel/electricity fault was detected and that a post-change test of the thermostatic control failed. He said the pressure-relief valve was not fitted to the house properly and a leak could not be detected until two months after the incident. Rhys Howell told the judge, Judge Margaret Lowe QC, that the pensioner

was not able to work and suffered ongoing pain and mental distress. He said she was left traumat

- (undocumented) Keymacro is an advanced, graphical-based application designed to quickly enable you to enter text, symbols and special characters. In addition to enabling you to type in lots of characters and their combinations, the tool also allows you to edit and record macros, convert documents to different character encodings, perform a variety of security and encryption

---

functions, as well as create simple customized webpages. No installation required Keymacro can be installed to any folder on the hard disk or a removable media unit such as a USB memory stick, without changing the registry keys or triggering the need to reinstall the operating system. This makes the tool easy to use and manage. Convert files from AVI, PDF, DOC, CHM, GIF, HTML, PCX, WMF, XLS, JPG, TIF, TGA, TIFF, ZIP, EXE, ICO, RAR, DRO, SND and other formats to Unicode text In order to

---

convert files to Unicode, Keymacro has a flexible selection mechanism for various file types. There are three modes for this purpose:

- Standard: the program analyzes the file extension (for example, .xls for Microsoft Office documents) and converts all files of the indicated type;
- Image conversion: the application examines the file in order to detect its file type;
- Digital signature conversion: the program attempts to detect the image type based on the file's digital signature (for example, .gif for animated

---

GIFs) and creates the Unicode files; Apart from that, you can specify the type of the new document in a separate text file. In addition to Unicode conversions, Keymacro is capable of converting TIFF images to various formats. Moreover, the tool enables you to export data from one format to another, create a simple file or edit the existing contents. Perform security and encryption functions  
The program enables you to set a digital signature, a password or perform secure document encryption. You can apply document

---

encryption before saving the file to protect its contents from being accessed. On the other hand, the tool can change the security settings for the file's contents or protect it with an arbitrary password. Furthermore, Keymacro enables you to protect files with a digital signature using the same procedure as in the case of digital document signatures. Thanks to this feature, you can encrypt important data such as: - Social Security numbers; - credit card numbers; - personal identification numbers;

Handles 1 to 20,000 pages.  
Creates documents of variable sizes: 1,250 KB-1.3 MB Does not produce documents of various image file sizes. Produces black and white documents of the same size as the source. Creates a PDF for single page files Efficient processing of TIFF files. Handles files with transparent layers. Supports batch processing and wildcard operations. Works on Windows 7 and Windows 8. You can download the application here. A: The

---

original MINIDJVU program itself is discontinued. But the author has released a replacement named RDJVU. Easy to use and even easier to use. No need to make a copie of the original program on your hard drive. Q: Execute php script when a listbox item is selected in Javascript I have a page with a select input list box and I want to execute a PHP script when the item is selected. This is for when I'm writing a query and need to execute some code when the item is selected. A: 1) Use jQuery's change event: When a list box changes, the

---

change event is fired. The change event handler is called for each selected item in the list box. `$('#select[name="mylistbox"]').change(function(){ // the event handler is called when the listbox has changed // the event data is an object with four properties. // // change will be true if the listbox has been changed, // change.item will be the selected item, // change.status will be the current state of the box (true if it is selected, false otherwise) // change.handled will be true if the event has been handled alert('item = '+this.value+' change =`

---

```
'+this.change+' change.item  
= '+this.change.item+'  
change.status =  
'+this.change.status+'  
change.handled =  
'+this.change.handled); //...  
}); 2) Use jQuery's onchange  
event: When a select box  
changes,

minidjvu is a simple-to-use command-line application designed to help you generate DjVu documents from TIFF images. It's capable of compressing multiple images as well as decoding single-page and black and white DjVu files.

---

The tool features several advanced users for skilled users. No installation required The tool's not wrapped in a setup kit, so you can copy the downloaded files to a preferred directory on the disk or to a removable storage unit, in order to seamlessly launch it on any PC with as little effort as possible. It doesn't change system registry settings or create files on the disk without your permission. Convert TIFF images to DjVu format As far as the interface is concerned, minidjvu adopts a console

---

window. After loading a single- or multi-page TIFF picture, it's possible to set the output DjVu file's name, set the level of aggression and number of pages, as well as customize the resolution, ask the tool to get rid of temporary files and open the resulted files with WinDjViu, if you have it installed on your computer. Moreover, the program gives you the possibility to preview the bash script you're about to run. The task shouldn't take long, after which you can open the new DjVu files to inspect results. Unfortunately, batch

---

processing isn't supported, which means that you can convert only one TIFF image at a time. Evaluation and conclusion The tool worked smoothly in our tests, without triggering the operating system to hang, crash or indicate errors. On the other hand, we couldn't get it to run on newer Windows models. We must also keep in mind that it hasn't received updates for a long time and likely has compatibility issues with modern hardware configurations. Nevertheless, minidjvu delivers a straightforward solution for

---

creating DjVu files from TIFF photographs.
