- [Uninstall] - Remove
reminder on close - Auto-
start/unstart - Handle system
notifications (Launcher or
Not) - Keep running with the
system - High CPU usage
when reminder active - Can
be combined to other
applications Add-on
Description: - Activate also
after the system - Handle
system notifications
(Launcher or Not) -
Automatically start/unstart -
Keep running with the
system - Can be combined to

other applications - Free,
released under GPL - No
ROOT SmrTuner is an easy-
to-use and powerful tool that
gives you access to much
more of your mobile phone
features, without having to
worry about installing lots of
apps. SmrTuner is fast and
responsive and allows you to
turn off "always on" features
in your mobile phone by
default. You can also access
different frequencies and
channels with high
precision. So with SmrTuner
you can: [?] Turn off your

mobile phone's screen and
Bluetooth [?] Turn off your
mobile phone's sound [?]

Adjust the phone's
brightness [?] Change the
phone's volume

ROOT SOftwist is an all-in-
one audio player that gives
you access to much more of
your mobile phone. SOftwist
is a full-featured audio
player that enables you to
listen to any audio file on
your mobile phone from
your computer. SOftwist is

so simple to use. You only need to press the W key to start playing an audio file and press the P key to stop playing. In addition to the W and P keys, you can also press the menu key to access more options: [?] Tune the audio output [?] Start/Stop playback [?] Toggle play/pause/next/previous [?] Fast forward or re

77a5ca646e

Customize the colors of the sticky with the different available color schemes. [?]

Position the sticky You can choose any position of the sticky or even draw a new position and shape in 3D. [?]

Folder support Each sticky note is a folder that you can place inside your own folders, and in which you can place your own sticky notes, inside the same folder. [?]

Hotkey support
When you create a new

sticky note, a key is automatically defined in the right top of the window.

You can configure the hotkey and quickly launch NPPSticky. [?] Self-healing

When a sticky note breaks (eg because it is double-tapped by mistake, the first sticky note) it will automatically create a new one at the same position.

You can turn this off if you want. [?] Auto-save

NPPSticky is very easy to use: when you create a new sticky note, you are given

the chance to save your work. This option is disabled by default, but you can activate it from the main menu by going to the Options section, and selecting "Auto-save".

Program Details: [?] All features are located in one single menu. [?] No other menu or window is required to work with NPPSticky. [?] The desktop theme is updated when NPPSticky creates a sticky note. [?] An administrator of the computer can disable and

change the background and text colors. [?] No other modifications are needed to install NPPSticky on a computer. [?] A good "quality assurance" level is included: NPPSticky is free and runs on Windows XP, Vista, 7, 8, 10. [?] NPPSticky comes with multiple color schemes: you have only to click on the color schemes button in the top left of the window and to choose the one you prefer. [?] The application is easy to use. License: NPPSticky is licensed under

the GNU General Public License version 3.0.

NPPSticky is a free software application that lets you make sticky notes. It is a great simple way to keep track of information, quick reminders and you can create sticky notes with custom shapes and colors. You can import pictures and any text you want in the sticky notes, can make multiple sticky notes, and you can give

What's New in the NPPSticky?
