You can tell him in a nice way that there is some annoying habit of his. In this case he should appreciate the fact that you had the courage to bring this up, even if you did it in a bit of an abrupt manner.

Q: Enumerate List of URLs using Selenium Python I am working on this automation project and I have written the code to locate the link for the url and check if it is correct or not. I have checked the url again and again with Firefox browser and it works fine. But I don't want to check all the url that I have and if there is a bug, I want to fix it and continue with other urls. I want to do this automation by any language so that I can do all the testing by one script. I want to check the url with Selenium Python. Now my code is below:

```
import os
import time
import sys
from selenium import webdriver
from selenium.webdriver.chrome.options import Options
from selenium.webdriver.common.keys import Keys
from selenium.webdriver.support import expected_conditions as EC
from selenium.webdriver.support.wait import WebDriverWait
from selenium.webdriver.support import expected_conditions as EC

driver = webdriver.Chrome(executable_path =
os.environ["CHROMEDRIVER"])
driver.get("")
time.sleep(5)
for url in range(0, 1000, 20):
    try:
        for link in driver.find_elements_by_tag_name("a"):
            if driver.get_element_by_xpath('//a[@href="/"']').get_attribute('href') == "":
                print('okay')
            else:
                print('fail')
    except Exception as e:
        print("FAIL")
        time.sleep(20)
driver.quit()
```
