STORY OF A GAME AVAILABLE NOW Tarnished is a brutal fantasy action RPG for Android. It is in the Lands Between where the storyline begins, the land of Elden and the land of mortals. In this world with its antiquity, a peculiar race of creatures called "Elgen" and "Senarians" live. It has been three hundred years since the Elden Ring, a deadly technology that controls the Elden and Senarians, fell. The power of the Elden Ring and the Senarians was broken. However, the power of the Elden Ring is still lingering and it is still dangerous. What's new:

In the file, you can see the data attributes with the data-id and data-target. I want the menu to become inactive whenever the user clicks outside of it, and activate when he clicks any of the buttons. A: If you are targeting.dropdown the following code should work fine, it hides the dropdown if an input element is clicked anywhere else:

```
$(document).ready(function() { $('.your_element').on('click', function(e) {

That easy. Installs in less than 3 minutes (the time it takes to download the program) and has no additional programs to download. After that, load Up the game, select click "New Game", then click "continue".

Now you will need the game patch. It is quite large so I used the crack provided above.

Click on "start Patch". Start it from the "startup folder".

Now you will need the application "Amplifon PAK/EX".

Click it. Then click "launch".

Click "install" and it will begin to install. When its finished, you will need a "Patcher".

It will show "patch.exe is either corrupted or not a valid application. Please contact the software vendor."

Open control panel, go to "add or remove programs", find "Amplifon PAK/EX", find "Repair", and select "repair".

It will attempt to repair it and if successful you will need to restart.

Launch the game and you will have to have administrator privileges again.

Click "keep patch", press "ok", then "ok" again to confirm.

The game will then go through the Patch, and after the patch is finished, press "Start" and the game starts.

When the game starts, load the game first, then load "New Game" and "Continue". Click "New Game" again, and then if you load the game after the patch is finished, it will start a new game for you.
