The only advantage I can think of is server bandwidth. Any other reasons to use local files? A: there is always an advantage to the first option, you need to maintain only one file, no different if you do it manually or use a JS library, like the great Grunt, but you have also a lot of reasons to use CDN, from the cache, the SEO, the speed... AutoCAD 2023 brings markup import and help to AutoCAD and DraftSight. Add markup to your drawing, follow along with a markup walkthrough to complete the markup, and then send the drawing to the RepRap 3D printer to send a draft of your new CAD model. AutoCAD 2023 also includes support for files created with the Print on Demand file format. The import is fully integrated into the Design Review

series of steps or actions. You can create and share workflows that you create on your own, or you can share existing workflows created by others.

Workflows are also a powerful tool for defining automated workflows in which you can apply commands that are triggered by system events or tool options. When you share workflows, you can choose to make the workflow executable to other users, or to enable the workflow to be added to the Explore Path and open it from the Explore Path menu. This means that anyone can find and use the workflow without having to download and install it. The workflows are also saved in the Open dialog to make finding them even easier. Workflows and the Explore Path also add the ability to preview step instructions in real time and to share them with other users. Command libraries: Command libraries are a convenient way to use common commands on multiple drawings, saving
