You can catch a glimpse of some of the new gameplay features like new defending, the pass and move control system, and much more. Steps to victory with UNDEFEATED! A brand new season means a brand new game mode in FIFA Ultimate Team™. Build an ultimate team of the best players in the world by using millions of real-world virtual coins. Draft, trade, and sell to gain an advantage in the FUT Draft mode. New season, new star ratings. The spotlight is on you! The best defence system in FIFA The defending system in FIFA is set to receive an important and much-needed overhaul and modernisation. The inspiration behind the new defending system is the modern-day ball-winger, the coveted in-between winger. He and his back-up team-mates receive passes from their full backs, cross in and on, and move the ball upfield with pace before playing simple one-touch passes or firing in shot. The result is a fast-paced game with no retreating, no time wasting, and no influence from your centre backs and full backs. Player feedback and the new Player Impact Engine As a player, you can now make smarter decisions by having more information about the ball and the player around you. Possession is king and you will no longer see your team get out of position with a tired old 'run and chase' mentality. In FIFA, your team-mates make the running, not you. With player feedback you can know where the ball is going, who's where, and what your team-mate is planning to do. Player Impact Engine means you can instantly see and feel what your team-mate is planning to do before he does.
