We were going to show you some of the great free programs we know of for our newer Windows 7 users, but to keep it short - I use everything on this list! I have been a Mac user for a long time (I bought my first Powerbook in 1997), but I've been using the Windows side of the computer for about 8 years now - I do use a Mac as my primary computer, though. I still consider myself a pretty novice Windows user, but with a little practice and Google help, I've learned to be able to accomplish some pretty high-tech feats! In the short term, at least, it seems as if the plan will help banks rebuild their capital cushions. The Treasury plan, which was announced on Thursday, includes guarantees of \$400 billion and \$300 billion respectively, and will be funded by guarantees from the FDIC. Earlier plans had called for the three largest banks, Bank of America, Citigroup and JP Morgan to raise \$100 billion each, via the Troubled Asset Relief Program (TARP) or Emergency Economic Stabilization Act of 2008. Government officials also said that the government would purchase preferred shares and debt of the four banks at a price of \$1.9 trillion. These dollars will be injected into the banks through purchases of investments made by the Federal Reserve. Citigroup, the country's largest bank, is required to raise \$1 billion through preferred shares. Bank of America and JP Morgan will each have to
