

This is a driver for USB TV USB Tuner. It works with an MSI DIGIVOX Duo DVB-T hardware interface. (Device ID 0x0000D100, revision number 0x00000010). Some parts of this code are very old. If you use it, I thank you. With this driver, you can use a USB DVB-T tuner with the Slim Mobile card of Fujitsu Siemens from MSI. It will work with Windows Vista and more on above the UNIT from 10.00. The device has an ID of 0x14aa:0160. The development aim is to provide a Kernel driver for D-TUNER and DVB-T adapter chips. Currently the driver will run on, and is verified to run on, hardware manufactured by: EDGE TV, MTK,

MediaTek, Philips, Sanyo, ST-Ericsson, and Technicolor. This driver is a development version. It is slightly less stable than the EDGE Linux DVB drivers; when it works properly, that is. The acer aspire will run the dvd drive as before.. I have a slim 9.7 inch Acer lap top which comes with DTV tuners on it. I am going to install this driver on it. This DTV tuner works fine on my computer. The Dvb-t is an extra usb port adapter which has a dvbt t adapter. Kliper (kernel) versions 2.4.31-15-rt11 and 2.6.24-rc4. - The tuner card works flawlessly with kernel versions up to 2.6.22-17, but in kernel version 2.6.22-19, the card does not work at all. This is with the freecom USB stick, also with MX5005. MX5005 and MX5020 tuner cards, the card works perfectly up to kernel version 2.6.22-15. The driver is compiled from the Realtek CVS headers and is not based on the original driver. More details are in the WWW-page of klipper:

<http://klipper.sourceforge.net>. You will need a 1.2.6 kernel compiled with make menuconfig, make and ndiswrapper.

used by V4L2 users. DVB-T/T2 devices usually have many IDs. Some of these are not usable with the Linux kernel drivers, or are found but have a wrong/hard to change/editable value. An example of an ID that is currently not usable is the ID specified by the mceUSB. The working IDs are the ones listed on the mceusb page (also see the bottom of the page). Do NOT use IDs not listed there! If you have problems with doing the download, simply find the name of the driver you are looking for on the bttv site and download the package.
