## **What's New in the Basic Hex Map Sphere?**

Basic Hex Map Sphere is a simple Java based application specially designed to offer users a basic hexagonal map on the surface of a sphere. What you have to do is to select the size, the method, the type of view and the type of surface, either terrain or sea coast. You can also choose the percentage of continental or island tiles. The program displays a preview of any modification made to the map and it can be saved in several formats on your computer. Using the program: 1. Download it from here: 2. To select the size of the map, choose the menu (e.g. Jupyter Notebook, Android Studio,...) 3. To select the method, choose the menu (e.g. QuickMap,...) 4. To select the type of view, choose the menu (e.g. Satellite,...) 5. To select the type of surface, choose the menu (e.g. Terrain,...) 6. To choose the percentage of continental or island tiles, choose the menu (e.g. Continental,...) 7. To save the preview, choose the menu (e.g. Jupyter Notebook, Android Studio,...) 8. To save the output, choose the menu (e.g. Jupyter Notebook, Android Studio,...) 9. To exit the program, choose the menu (e.g. Android Studio,...) Notes: 1. The size of the map is expressed in degrees of latitude. A 30° map gives 120° in diameter. 2. The method of projection is Mercator with the equator as the great circle. 3. The type of view is Mercator. 4. The type of surface is always the terrain. 5. The continental or island tiles are the same for both continental and island tiles. 6. The percentage of continental tiles is 25%. What is new in this release: 1. Translation to French: - thanks to Luc-Olivier Thiébaud 2. Improvement of the look of the program by using a custom editor to

load and save the basic hex map. 3. Simplification of the interface 4. Bug fixes Improvements in the last release: 1. The application now supports more map sizes: - 60°/300° - 90°/450° - 120°/600° 2. The maps are now scaled by percentage instead of pixels. This also means that the icons are now smaller. 3. The graph is now scaled to 100% as it is a percentage. 4. The satellite view is now fixed. 5. The following applications now support the Basic Hex Map Sphere format: - QuickMap - GlobalMap - Quick

## System Requirements For Basic Hex Map Sphere:

OS: Windows XP/Vista/7/8 CPU: 2.2 GHz minimum RAM: 2 GB minimum HDD: 1.5 GB minimum Graphics: DirectX 8.1 capable system with a 64-bit OS Sound: DirectX compatible sound card with 7.1 channel support Other: A keyboard and a mouse After the recent 2.0 version of WoW, this upcoming patch is going to be one of the biggest and most exciting updates that we've seen in the game since
