Keymacro.exe converts ID3v2.2 (or v1) mp3 files into a new file with ID3v2.4.3 (or v3) or ID3v2.4.4(or v4) tags. It was developed by Seungjo Park (www.keymacro.com) based on keymacro1.c written by Marius Bufalo (It uses jide-id3.jar library (Keymacro.exe is a batch file. You can run it using any batch editor. A: You can try MP3Tag (Windows installer here). The following example should allow you to get the mp3, tags, and file names of any mp3 that you might have. MP3Tag.exe "C:\Music\Alice In Chains\Dime.mp3" Note that the output you get is a bit different than other programs. It might help to create a text file and write out the info you want. A: You could use the 'getID3' library to get the tags from the MP3, then use Java to get the tags from the filename. The name will be encoded in UTF-8 so you might need to do some work to get it in the right format. Custom About Me Friday, May 16, 2008 Fireworks! I am so excited for these people! The ladies are from Hawaii and the men are from the peninsula. They are "grandparents" of sons and daughters of couples I've made for the past couple years. I can't wait to see them! They have been coming in and out of my house each day this week to get things ready for the party. The boys love to come by and spend time with me!
