At the risk of irritating and confusing acronyms, it's worth reminding you of the **Typekit Catalogue**. Especially at this point, a good few Photoshop versions back, it was only a name in the catalog, relevant only to developers. Now its feature set is so extensive that a Photoshop user would need to be a **Perspective Technician**. In its full sense, the CATALOGURE or Typekit is a digital marketplace that offers all manner of tools and templates - for example, font styles, premium fonts, and UI kits. Typekit also lets you sell fonts and UI kits and use the money that's produced to develop more of the same. In its current name, Adobe Typekit resembles Adobe's own cloud photo service, Adobe Cloud or as they call it, OneDrive. Typekit either owns or operates 30.6% of the entire global digital publishing industry. It's a commercial company employing about 150 people. Typekit is a welcome presence on your web browser. On an iPad or an iPhone, it's even much more welcome. Obviously, an iPad or an iPhone app is more a perfect fit for Typekit than a web browser. In an iPad or an iPhone app, the clutter of your web browser is eliminated. On the 2018 iPad, users can download the free iPad app (or buy the premium one) from the App Store or iTunes and start inserting Typekit fonts and UI kits directly into iOS, which means you get the full, professionally developed Typekit editor on your iOS device. To work as it is meant to, your iOS device must already have installed some or all of Typekit's fonts and UI kits.
