The app and Apple Pencil is still a convenient tool to work on a pretty large size documents, photos and sketches. It can be a digital painting app and a sketching tool. Below is a version of my own work. The app can also be used to design for print. In fact, one could easily create 3D designs without the use of a 3D modeling software. You can see it below. With a few taps, the application can transform your photos into something special and unique. The app can even be used to create a new design for WordPress using a beautiful free theme. Giving you the ability to create new looks for your photoshop, and you can save everything in a beautiful gallery on your device. **ABOVE:** I used Adobe Photoshop on the iPad with the Apple Pencil. Adobe Photoshop Camera represents our first AI-powered photography app. As most people have the same camera with them at all times, we're using machine learning to create a tool that leverages that camera, and the power of Photoshop to create new possibilities for mobile photography. As the first in the world, we're working to create an all-in-one camera and editing solution with the editing power of Photoshop, so you can create magical moments more easily. With as little as a few snaps of your smartphone's camera, you can instantly edit photos with Photoshop-level precision and creative power. The first version of Photoshop Camera is now available for test to early preview users. It will be arriving on the App Store and Google Play Store in 2020. We know that by releasing Photoshop Camera as an early preview, we might miss out on learning some things and improving the app. But we're not afraid of that. What we are afraid of is pulling back on the opportunity to

creatively express ourselves, or not listening to our customers. When the feedback we've received just yet tells us the release should be this month, we hustle to get it done. We may not know exactly what will be in the final release, but the more of our first version we release, the more feedback we'll get, and the stronger and better the app will be. The choice of when to ship is always ours, and we're not afraid to take that chance. Ready to send in your feedback? Here we are. Not only can you frame a shot you've taken and customize the colors, but you can completely change the look of the whole image with adjustments to skin tones, lighting, saturation, contrast, and exposure. And just like in Photoshop, you can apply effects like vignettes and lens corrections. Once you are satisfied with the image, you can save it as a new camera roll, or continue editing and applying other adjustments. All of your images are automatically saved in Lightroom, you can also batch-edit, and you can even share new creations online from within the application. e3d0a04c9c
