Named Picture Perfect, Picture Perfect HD, and Color Rush are just some of the new and improved Color Adjustment capabilities in Photoshop CC 2018. These tools are a fantastic addition to the whole family and allows all to be able to create a multitude of colors, and understand how to even produce beautiful black and white effects. It also includes a whole host of filters to create a unique image. The all-new Adjustment

Brush tool makes it easy to edit an image creatively, without having to use any of Photoshop's other editing tools. The Adjustment Brush can be found in the Flatten Image section of the Options menu, and allows you to brighten, lighten, or darken your image region that you paint with it. Alongside the Adjustment Brush, the new content-aware Fill filter makes it easier to fill in holes in images. It uses AI (Adobe Sensei) to quickly and intelligently fill in the gaps. You can use it to automatically fill in small areas that are too small for the Adjustment Brush, but not large enough to fill with a brush. It can also pick up objects and characters in your image, which makes it easier to create the new images that your customers will love. Simply that process is so much easier and more accurate than the other tools you normally use to fill in a hole. Adobe has added a lot more functionality to Content-Aware Fill in Photoshop CC 2018. They've also added the Square Object Selection tool, which can be found in the Features tab in the Tool Options. Many of the other tools have been repositioned to be easier to use. In Photoshop, this tool is located in the Features tab, and the Content-Aware algorithm is now grouped together, to make the most of its capabilities.
