From a touch interface to the new Layer Panel to the new AI-enhanced tools and more, the complete software looks and feels much more professional to use than Photoshop Elements. Using the company's flagship creative program this way has got to make Adobe happy. Adobe has published a set of brushes imported from the AI Files website. AI Brushes is a web-based system that allows users to find and download bot released and custom brushes.

Adobe has done a great job of making a selection of AI brushes the central "app store" for AI brushes. For users installing AI Brushes, the brushes have been automatically installed in Photoshop CS5. Even better, this will also be done for future releases of a minor version. ... So, if people share their brushes on the website, they will also automatically be installed with future software updates. It's a round-about way for them to make their brushes available for free, and an efficient way to distribute them. Adobe has updated various functions in various areas, such as the basic editing, Advancing Skin Tone and Collages. The most interesting functions include "Merge" which enables you to seamlessly combine individual images into a single final image. This allows Photoshop users to more easily edit images in Photoshop. If you combine images, you can edit them at the same time. While the merger can be done automatically, you can also add adjustment tools at specific positions, allowing you to achieve the desired overall effect.
